REMARKS: Michael,

As we discussed yesterday, attached is a requested revision to the existing Erosion Control Permit (#EXC09-00047). The new areas for temporary stockpiles of fill dirt are outlined on Sheet ESCP-1 and it is intended that these piles will be planted with sterile oat or wheat grass this fall so that erosion of the fill dirt will not occur. Quantities for the fill dirt stockpiles as well as the replacement fill area are also shown on Sheet ESCP-1. Also, please notice that we have included the concrete foundations in the middle of the site as a part of this erosion control permit. The existing silt fence just north of this location will adequately address erosion concerns in this area. Again, any disturbed areas will be planted either with a native seed mix (as shown on previous plans) or a sterile mix so that the plants do not have the chance of seeding and establishing new organics for us to eradicate. If you have any questions please contact me via email at Laurel.Byer@co.benton.or.us or call me at 541-766-6013. Thank you! Laurel
